

INCOME SURVEY NEEDED FOR GRANT/LOAN FUNDING

In the upcoming weeks Sabattus Sanitary District will be conducting an income survey to determine its eligibility for potential grants and loans under State and Federal agencies to complete a planning study and subsequently upgrade of the wastewater treatment facility. If qualified, these funding agencies can cover a significant portion of the construction costs. **Eligibility is determined by median household income of the residents of the service area.** To determine if our community is eligible for the program, an income survey of all the users of the wastewater system must be conducted. We are asking District customers to complete the survey that will request household information, including income. **THIS SURVEY IS COMPLETELY CONFIDENTIAL.** The District wants to thank residents in advance for their cooperation.
